

YOUNGSTOWN, OHIO HAS BEEN DESIGNATED THE FRACKING INDUSTRY'S DUMPING GROUND.

All around our city there are fracking "RESIDUAL WASTE" tanker truck cleaning businesses appearing. Are these the 4,000 jobs, including "INDIRECT" jobs that Chamber of Commerce Pres. Tom Humphries is promoting? The only jobs we will get are hauling fracking waste by truck, cleaning radioactive, toxic chemicals out of frack waste tanker trucks and going to spill sites to clean up fracking waste water and drilling mud. These are dangerous jobs that involve handling cancer-causing chemicals and radioactive drilling mud and frack well flowback water.

Above are tanks of waste in a lot off of Albert Street in Youngstown. Who left them here?

Citizens of Youngstown have observed these fracking tanker truck "cleaning" sites, a PARTIAL list:

- Environmental Services on Andrews Avenue in Youngstown

Which also had a fracking waste tanker from ChemTron, a hazardous chemical cleaning company crash on the way in, 12/13/2013

- Odyssey Environmental on Jones Ave.(off of Poland Ave.) in Youngstown: employees arrested for taking Campbell's city water from hydrant June 22, 2014.

- Austin Master Services 240 Sinter Ct., Youngstown

PUBLIC RECORDS REVEAL SINTER COURT RADIOACTIVE FRACKING WASTE PROCESSING CENTER WAS PERMITTED IN SECRET BY our Ohio Department of Natural Resources February 7, 2014.

- Iron Eagle on Amherst St. in Liberty-just outside of Youngstown city limits are cleaning radioactive, toxic fracking waste from tankers

- EverClear on Oakwood Ave. in Austintown-just outside of Youngstown city limits are cleaning radioactive, toxic fracking waste from tanker trucks

Citizens of Youngstown will take back local control and keep these hazards away from our homes

VOTE YES on the Youngstown Community Bill of Rights November 4, 2014
